

BHARATI VIDYAPEETH
(DEEMED TO BE UNIVERSITY)
INSTITUTE OF MANAGEMENT & RESEARCH,
NEW DELHI - 110063

City Hospital

A Major Project Report

Submitted in partial fulfillment of the requirements for the
Award of degree of Bachelor of Computer applications (BCA)

2021-2024

Submitted by

**Amandeep Singh
0211BCA038**

Guided by

**Dr. Mahesh Kumar Chaubey
(Project Guide)**

CERTIFICATE OF ORIGINALITY

This is to certify that the project report titled “**City Hospital**” submitted to Bharati Vidyapeeth (Deemed to be University), Pune in partial fulfillment of the requirement for the award of the Degree of Bachelor of Computer Applications is an original work carried out by me under the guidance of Dr. Mahesh Kumar Chaubey. The matter embodied in this project is a genuine work done by me and has been submitted neither to this University nor to any other University for the fulfillment of the requirement of the course of study.

CERTIFICATE FROM GUIDE

This is to certify that the minor project report titled “**City Hospital**” Submitted to Bharati Vidyapeeth (Deemed to be University) Institute of Management and Research, New Delhi in partial fulfillment of the requirement for the award of the Degree of the Bachelor of Computer Applications is an original work carried out by **Amandeep Singh** under my guidance. To the best of my knowledge and belief the matter embodied in this project is completed by the student and has been submitted neither to this University nor to any other University for the fulfillment of the requirement of the course of study.

Dr. Mahesh Kumar Chaubey

CERTIFICATE FROM DIRECTOR

This is to certify that the Project titled “**City Hospital**” is an academic work done by **Amandeep Singh** submitted in partial fulfillment of the requirement, for the award of the Degree of Bachelor of Computer Applications, from **Bharati Vidyapeeth (Deemed to be University), Pune**. It has been completed under the guidance of Dr. Mahesh Kumar Chaubey.

The authenticity of the project work will be examined by the viva-voce examiner, which includes data verification, checking duplicity of information etc., and it may be rejected due to nonfulfillment of quality standards set by the Institute.

Dr. Yamini Agarwal

Director

**Bharati Vidyapeeth
(Deemed to be University)
Institute of Management & Research, New Delhi**

PREFACE

In the rapidly evolving intersection of healthcare and technology, the development of a hospital website emerges as a pivotal endeavor. This project is a testament to our commitment to harnessing HTML, CSS, JavaScript, PHP, and MySQL to create a dynamic and intuitive digital platform.

Our aim is to bridge the gap between patients, healthcare professionals, and administrators, fostering seamless communication and enhancing accessibility to healthcare services. Through meticulous planning and execution, we aspire to demonstrate the transformative potential of web technologies in modern healthcare delivery.

This preface serves as an introduction to our project, providing a glimpse into the methodologies, technologies, and objectives that underpin its development. With gratitude to all who have supported us, we present this endeavor as a step towards revolutionizing healthcare accessibility and delivery.

ACKNOWLEDGEMENT

While I was preparing this project report, various information that I found helped me in the project and I am glad that I was able to complete this project and understand many things. Preparing this computer science project was an immense learning experience and I inculcated many personal qualities during this process like responsibility, punctuality, confidence, and others.

I would like to thank my teachers Dr. Mahesh Kumar Chaubey, Dr. Ajay Kumar who supported me all the time, cleared my doubts and to my parents who also played a big role in finalization of my project report. I am taking this opportunity to acknowledge their support and I hope that they keep supporting me like this in the future.

A project is a bridge between theoretical and practical learning and with this thinking I worked on the project and made it successful due to timely support and efforts of all who helped me.

Once again, I would like to thank my classmates and my friends also for their encouragement and help in designing and making my project creative. I am indebted to all of them. Only because of them I was able to create my project and make it a good and enjoyable experience.

Amandeep Singh

Index

CHAPTER 1 INTRODUCTION		Page no.
1.1	Introduction about Project	2
1.2	Present state of the art	3
1.3	Need of Computerization of System/ Problem in existing system	4
1.4	Proposed Software (What would S/W accomplish?)	5
1.5	Importance of the Work/project	5
 CHAPTER 2 SYSTEM ANALYSIS		
2.1	Analysis Methodology/ Requirement gathering techniques	7
2.2	Feasibility Study	8
2.3	Choice of Platforms	10
2.3.1	Software used	10
2.3.2	Hardware used	10
 CHAPTER 3 SYSTEM DESIGN		
3.1	Process Model used	12
3.2	Database Design (ERD/Data Dictionary/Table Design)	13
3.3	Functional Design (DFD)	13
3.4	Input Design (Screen shots of forms)	15
3.5	Output Design (Screen Shots of Report)	22

CHAPTER 4 TESTING AND IMPLEMENTATION

4.1	Testing Methodology (Types)	31
4.2	Testing Methodology applied (Why)	32
4.3	Test Cases	32
4.4	Test Data	39
4.5	Gap Analysis (Planned Vs Achieved)	39
4.6	Rework/ Retest	39
4.7	Implementation	40
4.8	Post Implementation	40
4.9	Hardware & Software Requirement	41
4.9.1	Hardware Requirement	41
4.9.2	Software Requirement	41

CHAPTER 5 CONCLUSION AND REFERENCES

5.1	Conclusion	43
5.2	Limitation of System	43
5.3	Future Scope for Modification	44

CHAPTER 1 : INTRODUCTION

- 1.1 Introduction**
- 1.2 Need of Computerization of System/Problem in existing system**
- 1.3 Proposed Software**
- 1.4 Importance of the Work/project**

1.1 Introduction about Project-

Welcome to City Hospital's website, your comprehensive online portal for all your healthcare needs. Our website is designed to provide easy access to information and services offered by our esteemed hospital.

Starting with our homepage, you'll find a user-friendly interface that introduces you to our hospital and its key features. From there, you can navigate to various sections including About, Services, Doctors, Appointment, Reviews, and Blogs.

In the About section, you'll discover detailed information about our hospital, including our mission, vision, and values. The Services section outlines the wide range of medical services and treatments we offer to cater to your healthcare needs.

Our Doctors section introduces you to our team of experienced and highly qualified medical professionals. You can learn more about their specialties and backgrounds to make informed decisions about your healthcare provider.

When you're ready to book an appointment, simply visit our dedicated Appointment section. Our easy-to-use booking system ensures convenience and efficiency in scheduling your medical consultations.

In the Reviews section, you can read feedback from our valued patients or share your own experience to help others make informed decisions about their healthcare journey.

Lastly, our Blogs section offers insightful articles and resources on various health topics to keep you informed and empowered about your well-being.

At City Hospital, we are committed to providing exceptional healthcare services and empowering our patients to lead healthier lives. Explore our website and discover the difference in healthcare excellence.

1.2 Present state of the art –

The present state of the art for our hospital website encompasses a comprehensive and user-friendly platform tailored to meet the diverse needs of patients and healthcare professionals alike. Our website serves as a centralized hub for accessing essential healthcare services and information seamlessly. Here are the key features and functionalities:

- Appointment System:**

Users can easily schedule appointments with healthcare providers through a user-friendly interface.

- Informational Sections:**

Detailed sections provide comprehensive information about the hospital's facilities, specialties, and medical staff, empowering patients to make informed decisions about their healthcare journey.

Dedicated sections such as About, Services, and Doctors offer insights into the hospital's mission, range of services, and profiles of medical professionals.

- Management of Services:**

Users can explore various healthcare services offered by the hospital, including diagnostic tests, surgeries, and wellness programs.

- Reviews and Feedback Mechanism:**

Patients can share their experiences and provide feedback about the hospital's services through a dedicated reviews section.

Transparent feedback mechanisms help maintain accountability and drive continuous improvement in service delivery.

- **Educational Resources and Blogs:**

The website hosts a repository of educational resources, including articles, videos, and FAQs, to empower users with knowledge about health-related topics.

Regularly updated blogs provide insights into healthcare trends, tips for maintaining well-being, and updates about the hospital's initiatives.

- **Responsive Design and Accessibility:**

The website features a responsive design that ensures seamless access across various devices, including desktops, tablets, and smartphones.

Accessibility features are integrated to cater to users with diverse needs, ensuring inclusivity and equal access to healthcare information and services.

In summary, our hospital website represents the pinnacle of modern healthcare technology, offering a holistic and user-centric approach to accessing healthcare services, information, and resources. Through continuous innovation and dedication to excellence, we strive to redefine the standards of patient care and engagement in the digital age.

1.3 Need of Computerization of System/ Problem in existing system-

In the current manual system, tasks such as appointment booking, patient record management, and accessing services are time-consuming and prone to errors. Users face challenges in searching, adding information, leading to inefficiencies and delays in service delivery. Additionally, manual verification processes are labor-intensive, requiring significant time investment. To address these issues and enhance operational efficiency, there is a critical need for computerization of the system. Implementing a digital platform will streamline processes, improve accessibility, and ensure accurate and timely management of hospital operations, ultimately enhancing the overall patient experience.

1.4 Proposed Software

The purpose of this website City Hospital Website is to provide all the Customer/Patients with a way to

- Book appointment
- View services
- Know about the doctors
- Explore latest blogs
- Read other's reviews
- Share their experiences

1.5 Importance of the work/project-

The website is very simple and easy in design. The website requires very low system properties. The system will work in almost all patterns.

It has the following importance:

Enhancement:

Project concentrations to improve and upgrading its efficiency and effectiveness.

Automation:

Project automates each and every activity of the manual system and increases its throughput.

Accuracy:

Project provides user accurate result when the user required it.

User-Friendly:

Project has a very user-friendly interface. User can easily work on the project. The software provides accurate result.

Maintenance Cost:

Reduce the cost of maintenance.

CHAPTER 2 : SYSTEM ANALYSIS

- 2.1 Analysis Methodology /requirement gathering techniques**
- 2.2 Feasibility Study**
- 2.3 Choice of Platforms**
 - 2.3.1 Software used**
 - 2.3.2 Hardware used**

2.1 Analysis Methodology /requirement gathering techniques-

It is the task of creating a list of requirements (functional system, technical, etc.) from the various end user like (customers, users, vendors, IT staff, etc.) that will be used as the basis for the requirements definition. It is an important part of any website and project management.

There are many types of requirement gathering techniques. Some of them are:

1. One-on-one interviews

The most common technique for gathering requirements is to sit down with the client/customer and ask them what they need.

2. Group interviews

Group interviews are similar to one-on-one interviews, except that more than one person is being interviewed-usually two or four. These interviews work well when all person is at the same level or has the same role.

3. Facilitated sessions

In a facilitated session, you bring a larger group (five or more) together for a common reason or purpose. Here we are trying to gather a set of common requirements from the group in a faster manner than if you were to interview each of them separately.

4. Questionnaires

Questionnaires are used to capture the requirements from end users in remote locations or those who will have only major input into the complete requirements. Questionnaires can also be used when you have to collect data from dozens, hundreds, or thousands of people.

5. Use cases

Use cases are basically stories that describe how individual processes work. The stories include people and describe how the solution works from the user perspective. Although the use cases may need to be distilled later into the more particular detailed requirements.

6. Brainstorming

On few projects, the requirements are not “uncovered” as much as they are “discovered”. In other words, the solution is brand new and needs to be developed as a set of ideas that people can agree to. After all the ideas are developed, the participants prioritize the ones they think are the best for this solution. The resulting consensus of best ideas is used for the basic requirements.

Note: In our Project we take 100 one to one interviews and Questionnaires

1. In one to one interviews we will ask some questions related to our Website from our user i.e. the Hospital.
2. In Questionnaires we will also ask about 10 questions related to our Website project.

We will do this task in our project so that efficiency and effectiveness of our Website will increase.

2.2 FEASIBILITY STUDY

As we all know that each and every Website needs to have a feasibility study for the complete understand ability of the entire system. Basically, it is an assessment of the practicality of a proposed plan or system or method.

A project feasibility study is a comprehensive report that examines in detail about the system. It is an evaluation of a proposed system or project to determine if it,

- (1) is technically feasible
- (2) is feasible within the estimated cost.
- (3) will be profitable.

A feasibility study is an initial study understands before the real work of a project starts to certain the likelihood of the project success.

2.2.1 ECONOMIC FEASIBILITY

The procedure is to determine the benefits and savings that are expected from a customer side and compare it with the costs. If your profits outweighs costs, then the decision is made to design and put into the system. We have designed a Website through which we can maintain the people and item records so manual labour cost is reduced. Otherwise further changes are made in the proposed system.

There are some points which tell how our website is economic feasibility is possible:

- It will reduce Manpower cost
- It will increase our profits by making this software

2.2.2 TECHNICAL FEASIBILITY

Technical feasibility is one of the earliest studies that must be regulate after the project has been identified. In large engineering projects consulting agencies that have abounded staffs of engineers and technicians conduct technical studies dealing with the projects. Our website is technically feasible as the user can perform various search operations with different criteria and this will ultimately reduce the time and increase the efficiency. In this intermediate labour cost will be reduced and improves efficiency.

There are some points which tell how our project's Technical feasibility is possible:

1. In our system the hospital can systematically store all the data
2. In our software we can display QR Code for the customer to pay.

2.2.3 OPERATIONAL FEASIBILITY

It is a measure of how accurately a system fix the problems, and takes merit of the opportunities find during scope definition and how it assures the requirements recognize in the requirements analysis phase of system development. In this, manual efforts will be reduced by providing this website.

There are some points which tell how our project's operational feasibility is possible:

1. This software will reduce the manual work for booking appointment.
2. The user can get the right information at the right time which will reduce time or cost.

2.3 CHOICE OF PLATFORM

2.3.1 HARDWARE USED

Processor : Intel Core i5@3.1Ghz

RAM : 4 GB of RAM

HDD : 1 TB

2.3.2 SOFTWARE USED

OS : MS Windows 10

Browser : Google Chrome

Front End : HTML, CSS, JS

Back End : MySQL

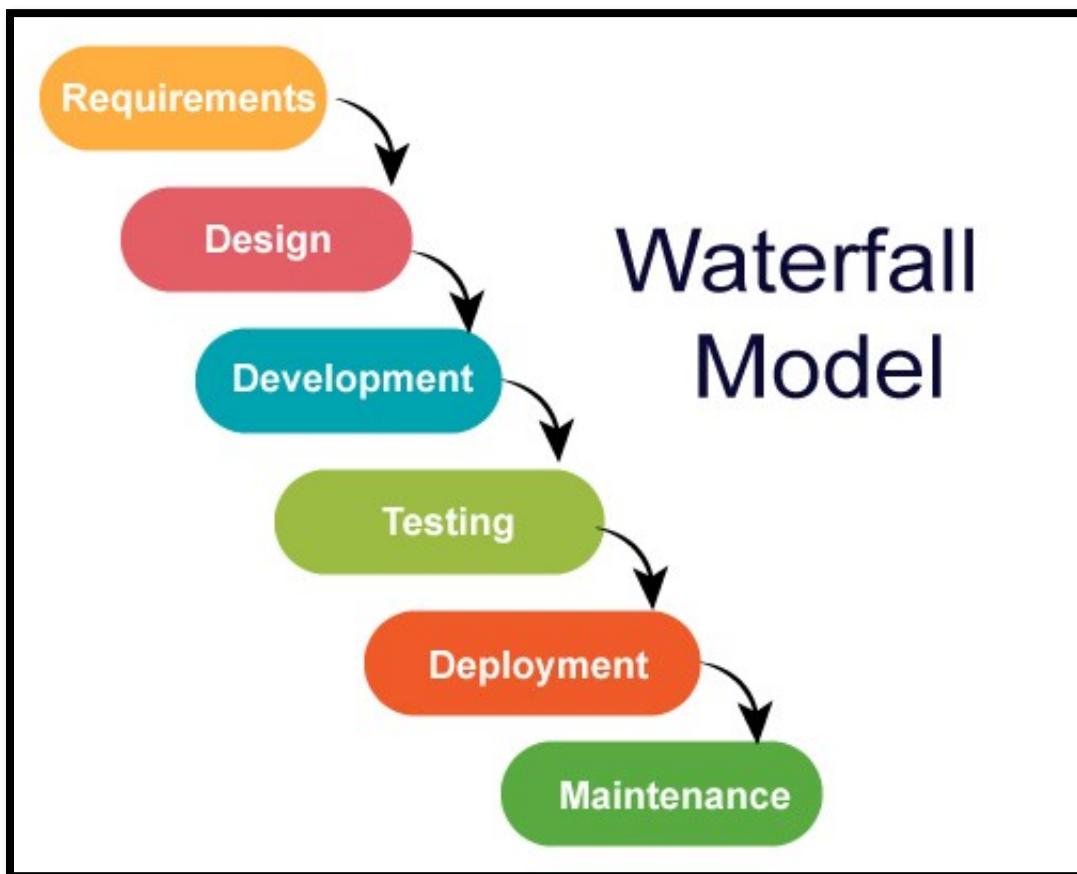

CHAPTER 3 : SYSTEM DESIGN

- 3.1 Process Model used**
- 3.2 Database Design**
- 3.3 Functional Design (DFD)**
- 3.4 Interface Design**
- 3.5 Output Design**

3.1 Process Model used

The **Waterfall Model** is a structured software development approach that progresses linearly through phases: requirements gathering, system design, implementation, testing, deployment, and maintenance. Each phase depends on the completion of the previous one. While it offers clarity and structure, its rigidity can be a limitation in dynamic environments.

In our project, we used this model because requirements were not clearly defined and fixed and there were several changes made after developing the website.

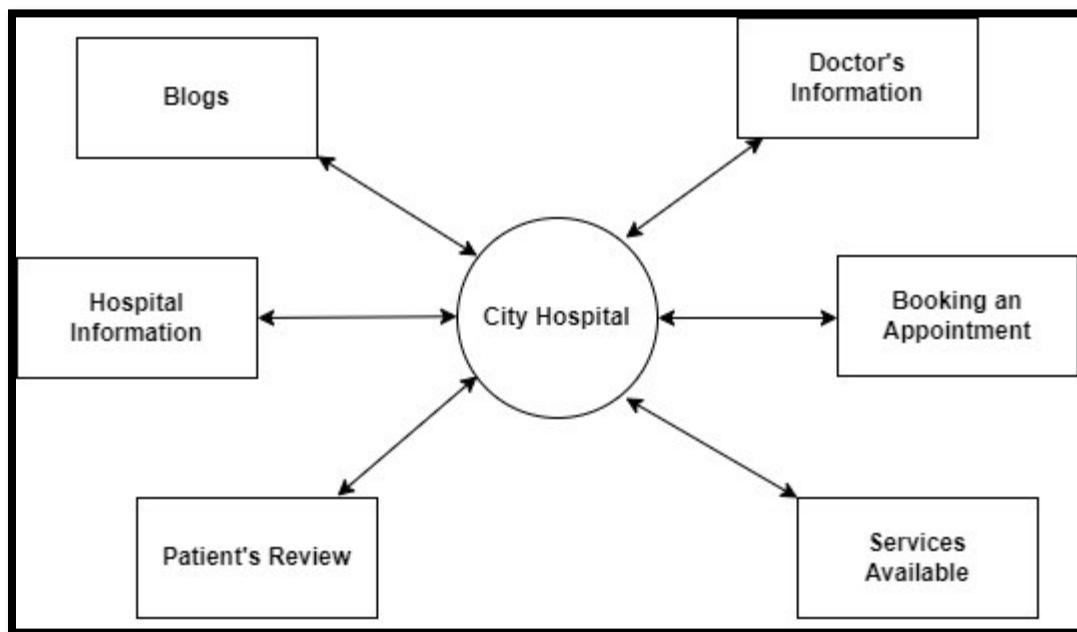

3.2 Database Design (ER Diagram)

Not Applicable for our project.

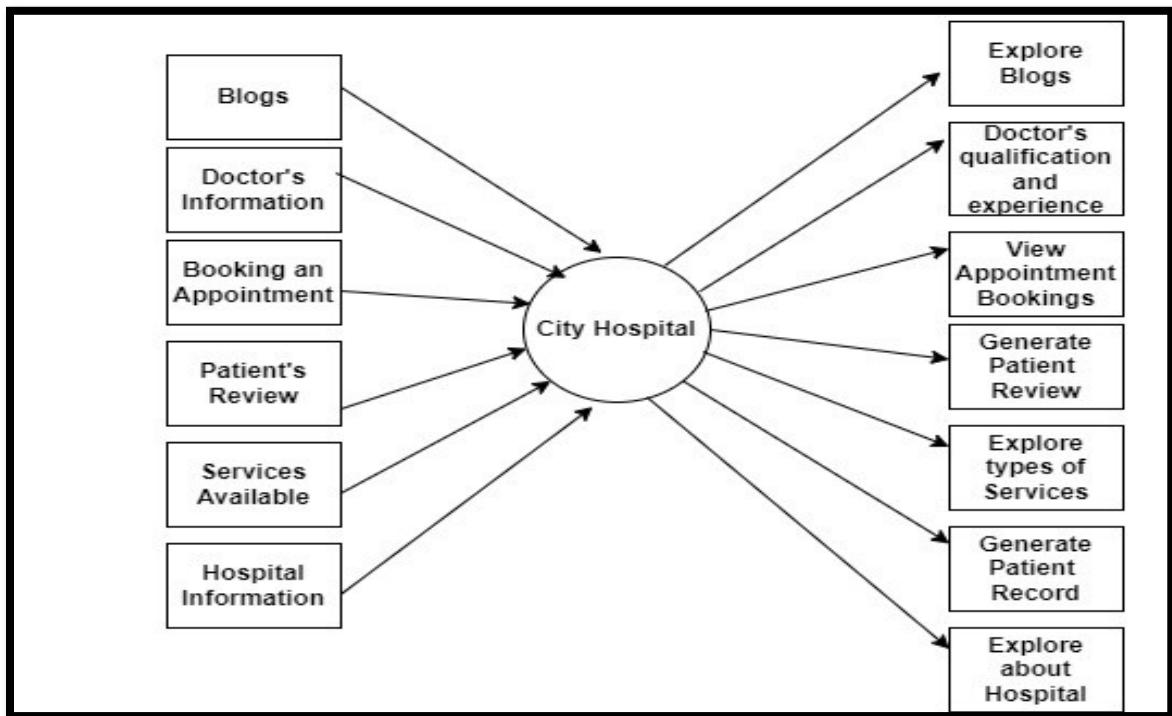

3.3 Functional Design (Data Flown Diagram)

A data flow diagram (DFD) is a graphic representation of the "flow" of data through an information system, modelling its process aspect. A DFD is often used as a initial step to create an overview of the system, which can later be elaborated.

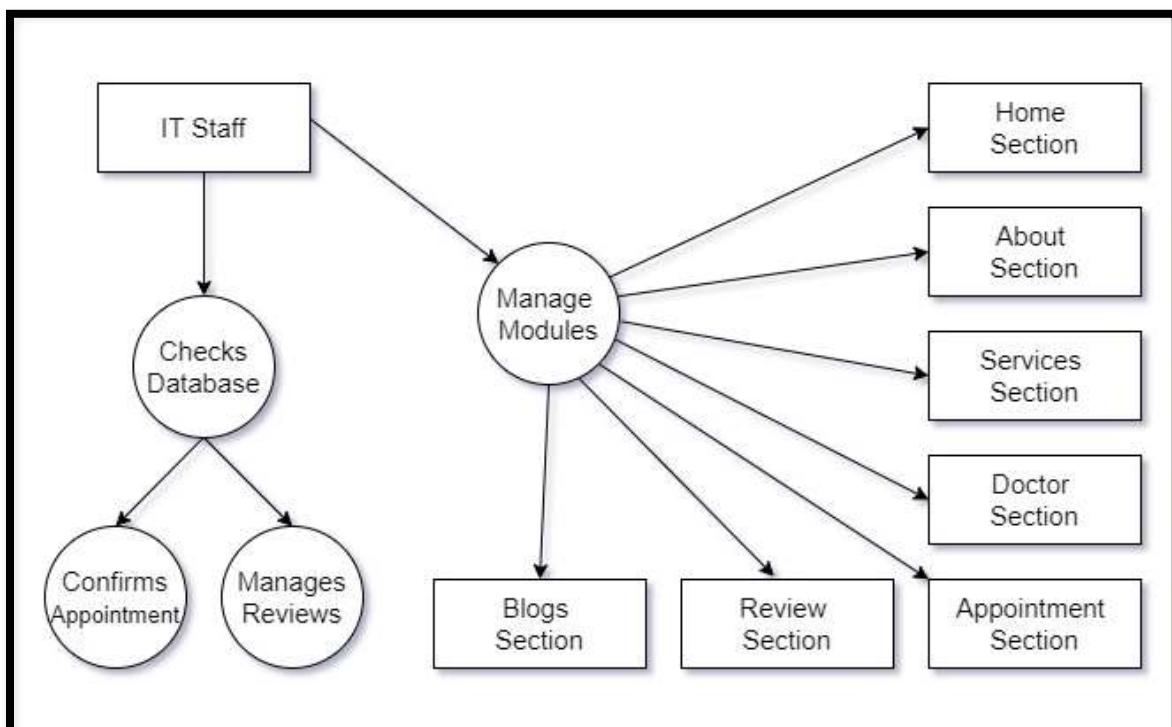

0 Level DFD

1st Level DFD

2nd Level DFD

Services Section > Learn More

This image shows a detailed view of the 'Free Checkups' service page. On the left is a large photograph of a female doctor in a white coat and pink shirt, wearing a stethoscope, examining an elderly patient who is lying in bed with an oxygen mask. The doctor is holding the patient's hand. In the background, there is medical equipment, including a monitor displaying vital signs. To the right of the photo is a section titled 'Free Checkups :'. It contains a bulleted list of benefits and a 'BACK' button at the bottom.

Free Checkups :

- Regular Health Checkups Are Crucial For Early Detection And Prevention Of Diseases. Our Hospital Organizes Free Health Checkup Camps Periodically In The Community.
- These Checkups Cover A Range Of Basic Health Parameters Including Blood Pressure, Blood Sugar Levels, Cholesterol Levels, And BMI (Body Mass Index).
- Qualified Healthcare Professionals Conduct These Checkups And Provide Personalized Health Advice And Guidance Based On The Results. By Offering Free Checkups, We Aim To Promote Preventive Healthcare And Empower Individuals To Take Proactive Steps Towards Better Health.

Appointment Section

The screenshot shows the 'APPOINTMENT NOW' section of the CityHospital website. At the top, there's a navigation bar with links for Home, About, Services, Doctors, Appointment, Review, and Blogs. Below the navigation is a large green header with the text 'APPOINTMENT NOW' in white. To the left of the form, there's an illustration of a doctor standing next to a smartphone, which has a heart rate monitor icon on its screen. The main area contains a form titled 'Make Appointment' with fields for Name, Age, Gender, Phone Number, Email, Your Problem, and a date input field ('dd-mm-yyyy --:--'). A 'Book Appointment' button is at the bottom right of the form.

Review Section

The screenshot shows the 'CLIENT'S REVIEW' section of the CityHospital website. The header is identical to the appointment page. The main title 'CLIENT'S REVIEW' is centered above three review cards. Each card features a circular profile picture of a patient and their name: Nirpesh Gupta, Rajana Chopra, and Ram Laal Prasad, each accompanied by a five-star rating. The reviews are as follows:

- Nirpesh Gupta**
I Recently Had An Excellent Experience At City Hospital. The Staff Was Incredibly Attentive And Compassionate, Making Me Feel Comfortable And Well-Cared-For Throughout My Visit. The Facility Was Clean And Well-Maintained, And The Medical Professionals Exhibited A High Level Of Expertise. Overall, I Highly Recommend City Hospital For Their Exceptional Service And Commitment To Patient Care.
- Rajana Chopra**
I Had The Best Experience At City Hospital, And I Am Compelled To Share My Thoughts. The Staff Was Incredibly Attentive And Caring, Making Me Feel Well-Supported Throughout My Stay. The Medical Team Exhibited A High Level Of Expertise And Professionalism, Ensuring That I Received The Best Possible Care. I Highly Recommend City Hospital For Their Exceptional Service And Compassionate Approach To Patient Care.
- Ram Laal Prasad**
Few Days Back I Visited City Hospital. From The Moment I Walked In, The Staff Was Welcoming And Attentive. The Facility Was Clean, And The Waiting Time Was Minimal. The Medical Professionals Were Knowledgeable, Empathetic, And Took The Time To Explain Procedures And Answer Any Questions. Overall, City Hospital Is A Top-Notch Healthcare Facility, And I Would Highly Recommend It To Others Seeking Quality Medical Care.

Cancer And Nutrition: A Holistic Approach

Dr. Deepti Khatuja | Mar 05, 2024

Nutrition Plays A Vital Role In Cancer Prevention, Treatment, And Overall Well-Being. A Holistic Approach To Cancer Care Encompasses Not Only

Medical Interventions But Also Dietary Choices And Lifestyle Factors That Can Influence Cancer Risk, Treatment Outcomes, And Quality Of Life. In This Article, We Will Explore The Relationship Between Cancer And Nutrition And Discuss Strategies For Incorporating Healthy Eating Habits Into A Comprehensive Cancer Care Plan.

Cancer Prevention Through Healthy Eating:

A Nutritious Diet Rich In Fruits, Vegetables, Whole Grains, Lean Proteins, And Healthy Fats Can Help Reduce The Risk Of Developing Certain Types Of Cancer. Key Dietary Components Associated With Cancer Prevention Include: Antioxidants: Found In Colorful Fruits And Vegetables, Antioxidants Help Protect Cells From Damage Caused By Free Radicals, Which May Contribute To Cancer Development.

Fiber:

Foods High In Fiber, Such As Whole Grains, Legumes, Fruits, And Vegetables, Can Help Regulate Digestion And Promote Gut Health, Potentially Reducing The Risk Of Colorectal Cancer.

Omega-3 Fatty Acids:

Foods High In Fiber, Such As Whole Grains, Legumes, Fruits, And Vegetables, Can Help Regulate Digestion And Promote Gut Health, Potentially Reducing The Risk Of Colorectal Cancer.

Limiting Processed And Red Meats:

High Consumption Of Processed And Red Meats Has Been Linked To An Increased Risk Of Colorectal And Other Cancers. Choosing Lean Proteins Such As Poultry, Fish, And Plant-Based Sources Can Help Lower Cancer Risk.

Nutritional Support During Cancer Treatment:

Cancer Treatment, Such As Chemotherapy, Radiation Therapy, And Surgery, Can Place Significant Demands On The Body And May Impact Appetite, Digestion, And Nutrient Absorption. Proper Nutrition During Treatment Is Essential For Supporting The Immune System, Maintaining

Maintaining Adequate Caloric Intake:

Cancer Patients May Experience Appetite Loss, Nausea, Or Taste Changes That Can Affect Food Intake. Consuming Small, Frequent Meals And Snacks That Are Nutrient-Dense Can Help Meet Calorie And Protein Needs.

Managing Side Effects:

Certain Foods And Dietary Strategies May Help Alleviate Common Side Effects Of Cancer Treatment, Such As Nausea, Diarrhea, And Mouth Sores. For Example, Ginger Can Help Reduce Nausea, While Bland, Soft Foods May Be Easier To Tolerate For Individuals Experiencing Mouth Sores Or Difficulty Swallowing.

Hydration:

Staying Hydrated Is Essential For Supporting Overall Health And Aiding In The Elimination Of Toxins From The Body. Cancer Patients Should Aim To Drink Plenty Of Fluids Throughout The Day, Opting For Water, Herbal Teas, And Electrolyte-Rich Beverages.

CHAPTER 4 : TESTING AND IMPLEMENTATION

4.1 Testing Methodology

4.2 Testing Methodology applied

4.3 Test Cases

4.4 Test Data

4.5 Gap Analysis (Planned Vs Achieved)

4.6 Rework/ Retest

4.7 Implementation

4.8 Post Implementation

4.9 Hardware & Software Requirement

4.9.1 Hardware Requirement

4.9.2 Software Requirement

4.1 Testing Methodology (Types)

Testing is a process of executing a program with the significance of finding an error. A good test is one that has high probability of finding the yet unfound error. Testing should regularly uncover different classes of errors in a minimum amount of time with a minimum amount of efforts. A software composition that includes a software requirement specification, a design specification and source code.

1. A software composition that includes a test plan and procedure, any testing tool and test cases and their expected results.

Testing is divided into several distinct operations:

1. Unit Testing

Unit test comprises of a set tests performed by an individual program earlier to the integration of the unit into large system. A program unit is usually the minor free functioning part of the whole system. Module unit testing should be as complete as possible to ensure that each representation handled by each module has been tested. All the units that makeup the system must be tested independently to assure that they work as required. During unit testing some errors were lifted and all of them were rectified and handled well. The result was so simple satisfactory and it worked well.

2. Integration Testing

It is the phase in software testing in which specific software modules are combined and tested as a group. It happen after unit testing and before validation testing. Integration testing takes as its input modules that have been unit tested, groups them in big modules, keep tests defined in an integration test plan to those aggregates, and delivers as its output the coordinate system ready for system testing.

4.2 Testing Methodology Applied (Why)

The purpose of integration testing is to confirm functional, performance, and reliability requirements placed on major design items. These design items i.e., assemblies are exercised through their interfaces using testing, success and error cases being pretend via relevant guideline and data inputs. Test cases are built to test whether all the elements within assemblies interact correctly or not, for example across procedure calls or process activities, and this is done after testing individual modules, i.e., unit testing. The idea of a building block approach, in which confirm assemblies are added to a verified base which is then used to support the testing of further assemblies .Software Integration Testing is executes according to the Software Development Life Cycle (SDLC) after module and functional tests. The cross-dependencies for software integration testing are: schedule for integration testing, strategy and selection of the tools used for integration, define the cyclomatic complexity of the software and software architecture, reusability of modules and life-cycle/ versioning management

4.3 Test cases.

4.3.1 Characteristics of a good test case -

***ACCURATE : EXTRACT THE PURPOSE.**

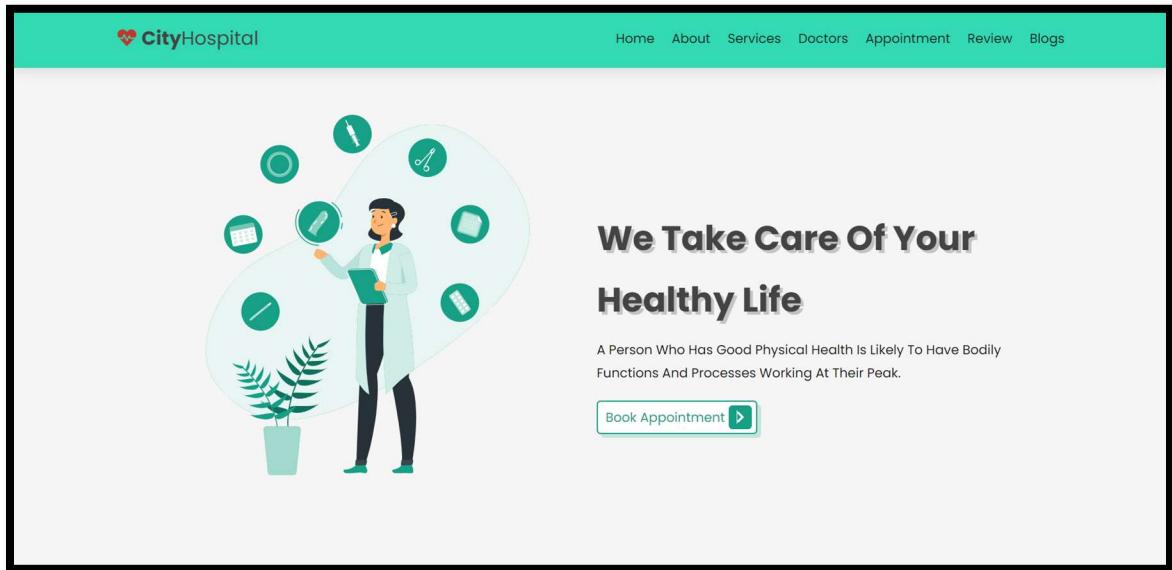

***ECONOMICAL : NO UNECESSARY STEPS OR WORDS.**

***TRACEABLE : CAPABLE TO TRACE THE REQUIREMENTS.**

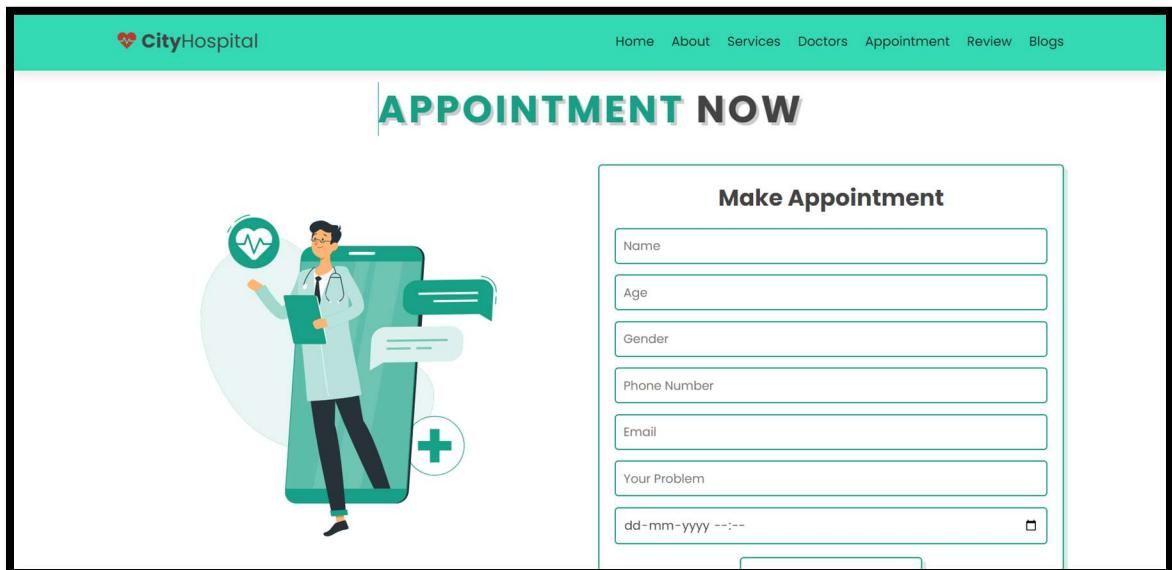

***REPEATABLE : CAN BE USED TO EXECUTE THE TEST OVER AND OVER.**

***REUSABLE : CAN BE REUSED**

Test case 1: On clicking Book Appointment button in Home Section

You are redirected to Appointment section.

Test case 2: On clicking Learn More button in About Section

The screenshot shows the 'ABOUT US' page of the City Hospital website. At the top, there is a navigation bar with links for Home, About, Services, Doctors, Appointment, Review, and Blogs. The main title 'ABOUT US' is centered at the top in a large, bold, teal font. Below the title is a circular illustration featuring three healthcare professionals: two women in green scrubs and one man in a light blue doctor's coat with a stethoscope. To the right of the illustration, the text 'Take The World's Best Quality Treatment' is displayed in bold black font. A paragraph of text follows, describing the hospital's commitment to quality and innovation. At the bottom right of the page is a 'Learn More' button with a right-pointing arrow.

Following Page Appears

The screenshot shows the main landing page of the City Hospital website. It features a large aerial photograph of the hospital building, which is a modern, multi-story structure with a green roof and a prominent helipad on top. The building is surrounded by lush green trees and a parking lot. To the right of the image, the text 'City Hospital' is displayed in a large, bold, dark font. Below this, a detailed paragraph describes the hospital's history, services, and commitment to patient care. At the bottom right of the page is a 'BACK' button with a left-pointing arrow.

Test case 3: On clicking Learn More button for any Service

The screenshot shows the 'OUR SERVICES' section of the CityHospital website. It contains eight service cards arranged in two rows of four. Each card includes an icon, the service name, a brief description, and a 'Learn More' button.

- Free Checkups:** City Hospital Offers Complimentary Checkups, Ensuring Accessibility To Preventive Healthcare For All. [Learn More](#)
- 24/7 Ambulance:** Our Dedicated Ambulance Service Operates Around The Clock, Providing Swift And Reliable Emergency Transport For Patients In Need. [Learn More](#)

ashneet Kaur	5	"I recently had the privilege of experiencing the ..."

4.4 Test Data

Test data is exactly the input given to a software program. It represents data that affects or is affected by the implementation of the specific module. Some data may be used for positive testing, typically to check that a given set of input to a given function produces a predicted result. Other data may be used for negative testing to test the capacity of the program to handle unusual, extreme, exceptional, or unexpected input. Poorly designed testing data may not test all possible test scenarios which will prevent the quality of the website.

4.5 Gap Analysis (Planned Vs Archived)

Planning measures means the time your resources spend working that can be billed to a client. Actual utilization, then, is a view into how much work an exact or a specific resource has scheduled, both in the past and future. What's important about this specific report is that it highlights the relationship between an individual's actuals and scheduled hours measured to predefined organization and personal targets that are necessary to achieve to improve or meet complete company profitability goals.

This metric is useful for you to know where you land month-over-month — are resources hitting scheduled targets, and if not, you can dig into what happened. You can also use this data in corporate to see where improvements need to be made, for example you are running at 62% utilization, but target is at 65%, so you are 3% under.

4.6 REWORK

If there is any error, it is important to rectify it.

Also, it should be rechecked and retested on different parameters after a specific period of time.

Checking and making compatibility is also necessary.

4.7 Implementation

After testing of the website, proposed website is provided to the Hospital. Implementation is a process of switching the manual system with a newly developed system and making it useful without disturbing the functionality of the organization.

There are 3 types of implementation

- 1) Fresh Implementation
- 2) Replacement Implementation
- 3) Modified Implementation

4.8 Post implementation

A post implementation review is an evaluation of a website in terms of the extent to which the website accomplishes stated objective system accomplishes stated objective and actual project cost exceeds initial estimates.

It is normally carried out by the people who have an independent view point and are not responsible for the development and maintenance of the website while evaluating a website, the following points are normally considered.

- 1) Performance Evaluation
- 2) Cost Analysis
- 3) Time Analysis
- 4) User Satisfaction
- 5) Documentation Review Plan
- 6) Hardware Review Plan
- 7) Ease for modification
- 8) Failure Rate

4.9 Hardware & Software Requirement

4.9.1 HARDWARE REQUIREMENTS

Processor : Intel Core i5@3.1Ghz or Above

RAM : 4 GB of RAM

HDD : 16 GB

4.9.2 SOFTWARE REQUIREMENTS

OS : Windows 7 or Above

Browser : Any Browser (Chrome, Edge, etc.)

Database : MySQL

CHAPTER 5 : CONCLUSION AND REFERENCE

- 5.1 Conclusion**
- 5.2 Limitation of System**
- 5.3 Future Scope for Modification**
- 5.4 References/ Bibliography**

5.1 CONCLUSION

The project “City Hospital” is completed, satisfying the need design for specifications. The website provides a user-friendly interface. The website is developed with modular approach. All modules in the website have been tested with valid data and invalid data and everything work outstanding. Thus the website has fulfilled all the target or goals identified and is able to replace the existing websites. The constraints are met and overcome successfully. The website is designed as like it was chooses in the design phase. This website has a user-friendly screen that allow the user to use without any inconvenience.

The website has been tested with live data and has provided an outstanding result. Hence the website has proved to work efficiently.

5.2 LIMITATIONS OF SYSTEM

Existing system refers to the offline ways that is being observe till now. The existing system requires more computational time, more manual work, and the complexity involved is high. After receiving the appointment into database, staff need not to worry about the appointments received through the website and hence decrease the manual labor. But in early years it is not easy for the hospitals to write the whole records manually and it also increases labour of the employees. Existing system requires large paper work and even a small transaction require many papers fill. Loss of even a single paper led to difficult situation because all the papers are connected with each other. In existing system it is not easy to share data. Also the two departments in an organization cannot interact with each other without the real movement of data.

5.3 Future Scope for Modification

To avoid all these limitations and make the working more perfectly the system needs to be computerized.

5.4 References/ Bibliography

We have taken references from many resources like YouTube and many websites.

Ashneet Kaur

5 Stars

I Recently Had The Privilege Of Experiencing The Exceptional Services Provided By City Hospital, And I Must Say, I Was Thoroughly Impressed. From The Moment I Stepped Through The Doors, I Was Greeted With Warmth And Professionalism. The Medical Staff Demonstrated Unparalleled Expertise And Care Throughout My Entire Treatment Journey. The Hospital's State-Of-The-Art Facilities And Efficient Processes Ensured A Smooth And Comfortable Experience. I Highly Recommend City Hospital To Anyone Seeking Top-Notch Healthcare Services. Thank You To The Dedicated Team For Their Unwavering Commitment To Patient Care.

A-3 SAMPLE OUTPUT

The image shows a screenshot of the phpMyAdmin interface. The left sidebar lists databases: New, bvdu_admission, bvimrbca, contact_db, contact_form, reviews, hospital, information_schema, mysql, performance_schema, phpmyadmin, and test. The "contact_db" database is selected. The main panel shows the "reviews" table with the following data:

name	rating	comment
ashneet Kaur	5	"I recently had the privilege of experiencing the ..."

23     <h3>Myths and Facts About Cancer</h3>
24     <p> Dr. Vinod Raina | Mar 07, 2024 <br><br>
25
26     Cancer is a complex and often misunderstood disease that affects millions of people worldwide. Despite advancements in research and treatment, there are still many misconceptions surrounding cancer that can lead to fear, stigma, and misinformation. In this article, we aim to debunk some common myths about cancer and provide accurate information to promote better understanding and awareness.<br><br>
27
28     <b>Myth 1: Cancer is always a death sentence.</b><br>
29
30     Fact: While a cancer diagnosis can be frightening, it's essential to understand that many people survive cancer and go on to live healthy, fulfilling lives. Advances in early detection, treatment modalities, and supportive care have significantly improved survival rates for
```

```
31 various types of cancer. With timely diagnosis and appropriate treatment, many cancers are now considered manageable chronic conditions.
32 <br><br>
33 <b>Myth 2: Only older people get cancer.</b><br>
34
35     Fact: While age is a significant risk factor for cancer, it can affect people of all ages, including children and young adults. Certain types of cancer, such as prostate cancer and breast cancer, are more common in older adults, but others, like leukemia and brain tumors, can occur at any age. It's important for people of all ages to be aware of potential cancer symptoms and undergo recommended screenings based on their risk factors.<br><br>
36
37 <b>Myth 3: Cancer is contagious.</b><br>
38
39     Fact: Cancer is not contagious and cannot be spread through casual contact, such as hugging, kissing, or sharing food. Cancer develops due to genetic mutations or environmental factors that lead to abnormal cell growth in the body. While certain infectious agents, such as the human papillomavirus (HPV) and the hepatitis B and C viruses, can increase the risk of developing certain cancers, the cancers themselves are not contagious.<br><br>
40
41 <b>Myth 4: Cancer is caused by a single factor, such as genetics or lifestyle.</b><br>
42
43     Fact: Cancer is a multifactorial disease influenced by a combination of genetic, environmental, and lifestyle factors. While certain genetic mutations may increase an individual's predisposition to cancer, lifestyle choices such as smoking, poor diet, lack of exercise, and exposure to carcinogens can also play significant roles in cancer development. Additionally, factors like age, hormonal changes, and chronic inflammation can contribute to cancer risk.<br><br>
44
45 <b>Myth 5: Alternative therapies can cure cancer without conventional treatment.</b><br>
46
47     Fact: While complementary and alternative therapies may offer symptom relief and support for cancer patients, there is no scientific evidence to support the claim that they can cure cancer on their own. Conventional cancer treatments, such as surgery, chemotherapy,
```

```
48 radiation therapy, and targeted therapy, are backed by extensive research and clinical trials demonstrating their effectiveness in treating
49 various types of cancer. It's essential for cancer patients to work closely with their healthcare providers to develop a comprehensive
50 treatment plan that incorporates evidence-based therapies.<br><br>
51 <b>Myth 6: Superfoods or special diets can prevent or cure cancer.</b><br>
52
53     Fact: While maintaining a healthy diet rich in fruits, vegetables, whole grains, and lean proteins is important for overall health and may
54 reduce cancer risk, there is no single "superfood" or specific diet that can prevent or cure cancer. Instead, a balanced diet combined with
55 regular exercise, avoidance of tobacco and excessive alcohol consumption, and appropriate cancer screenings can help reduce the risk of
56 developing certain cancers and improve overall well-being.<br><br>
57 <b>Myth 7: Cancer always causes pain.</b><br>
58
59     Fact: While some cancers can cause pain, especially as they advance or spread to nearby tissues, not all cancer patients experience pain.
60 Many cancers are detected at an early stage before symptoms develop, while others may cause symptoms that are not painful, such as changes
61 in bowel habits, unexplained weight loss, or persistent fatigue. Pain management is an essential component of cancer care, and healthcare
62 providers can offer a variety of treatments to help alleviate pain and improve quality of life for cancer patients.<br><br>

23     <h3>Cancer and Nutrition: A Holistic Approach</h3>
24     <p>Dr. Deepti Khatuja | Mar 05, 2024<br><br>
25
26     Nutrition plays a vital role in cancer prevention, treatment, and overall well-being. A holistic approach to cancer care encompasses not only medical interventions but also dietary choices and lifestyle factors that can influence cancer risk, treatment outcomes, and quality of life. In this article, we will explore the relationship between cancer and nutrition and discuss strategies for incorporating healthy eating habits into a comprehensive cancer care plan.<br><br>
27
28     <b>Cancer Prevention Through Healthy Eating:</b><br>
29
30     A nutritious diet rich in fruits, vegetables, whole grains, lean proteins, and healthy fats can help reduce the risk of developing certain
```

```
31
32   Antioxidants: Found in colorful fruits and vegetables, antioxidants help protect cells from damage caused by free radicals, which may contribute to cancer development.<br><br>
33
34   <b>Fiber:</b><br>
35
36   Foods high in fiber, such as whole grains, legumes, fruits, and vegetables, can help regulate digestion and promote gut health, potentially reducing the risk of colorectal cancer.<br><br>
37
38   <b>Omega-3 Fatty Acids:</b><br>
39
40   Foods high in fiber, such as whole grains, legumes, fruits, and vegetables, can help regulate digestion and promote gut health, potentially reducing the risk of colorectal cancer.<br><br>
41
42   <b>Limiting Processed and Red Meats:</b><br>
43
44   High consumption of processed and red meats has been linked to an increased risk of colorectal and other cancers. Choosing lean proteins such as poultry, fish, and plant-based sources can help lower cancer risk.<br><br>
45
46   <b>Nutritional Support During Cancer Treatment:</b><br>
47
48   Cancer treatment, such as chemotherapy, radiation therapy, and surgery, can place significant demands on the body and may impact appetite, digestion, and nutrient absorption. Proper nutrition during treatment is essential for supporting the immune system, maintaining strength and energy levels, and promoting healing and recovery. Key considerations for nutritional support during cancer treatment include:<br><br>
49
50   <b>Maintaining Adequate Caloric Intake:</b><br>
51
52   Cancer patients may experience appetite loss, nausea, or taste changes that can affect food intake. Consuming small, frequent meals and
```

```
53
54   <b>Managing Side Effects:</b><br>
55
56   Certain foods and dietary strategies may help alleviate common side effects of cancer treatment, such as nausea, diarrhea, and mouth sores. For example, ginger can help reduce nausea, while bland, soft foods may be easier to tolerate for individuals experiencing mouth sores or difficulty swallowing.<br><br>
57
58   <b>Hydration:</b><br>
59
60   Staying hydrated is essential for supporting overall health and aiding in the elimination of toxins from the body. Cancer patients should aim to drink plenty of fluids throughout the day, opting for water, herbal teas, and electrolyte-rich beverages.<br><br>
61   </p>

21   <div class="content">
22     <h3>CAR T cell therapy</h3>
23     <p> Dr. Rahul Bhargava | Mar 04, 2024<br><br>
24
25     <b>What is CAR T cell therapy? </b><br>
26
27     CAR T cell therapy is a form of immunotherapy that involves reprogramming a patient's T cells (a type of immune cell) to better recognize and attack cancer cells. CAR stands for chimeric antigen receptor, which is a synthetic receptor that is added to the T cells to enhance their cancer-targeting abilities.<br><br>
28
29     <b>How does CAR T cell therapy work?</b><br>
30
31     T cells are collected from a patient's blood and genetically modified in a laboratory to express CARs on their surface. These CAR-equipped T
```

```
32
33   cells are then multiplied in number and infused back into the patient's bloodstream. Once inside the body, the modified T cells can
34   recognize and bind to specific proteins on cancer cells, leading to their destruction.<br><br>
35
36   <b>What types of cancer can be treated with CAR T cell therapy? </b><br>
37
38   CAR T cell therapy has shown promising results in the treatment of certain types of blood cancers, such as leukemia and lymphoma. Research
39   is ongoing to explore its potential for treating solid tumors as well.<br><br>
40
41   <b>Who is eligible for CAR T cell therapy? </b><br>
42
43   CAR T cell therapy is typically reserved for patients with certain types of blood cancers who have not responded to traditional treatments
44   like chemotherapy or stem cell transplant. Eligibility criteria may vary depending on factors such as the specific type of cancer and the
45   patient's overall health.<br><br>
46
47   <b>What are the potential side effects of CAR T cell therapy? </b><br>
48
49   While CAR T cell therapy can be highly effective, it can also cause side effects, including cytokine release syndrome (CRS), which can lead
50   to fever, low blood pressure, and other flu-like symptoms. Another potential side effect is neurologic toxicity, which can cause confusion,
51   seizures, or other neurological symptoms. These side effects can range from mild to severe and require close monitoring and management.
52
53
54   <b>What is the success rate of CAR T cell therapy? </b><br>
55
56   The success rate of CAR T cell therapy can vary depending on factors such as the type and stage of cancer being treated. In some cases, CAR
57   T cell therapy has led to long-term remission or even cure for patients with certain types of blood cancers. However, not all patients
58   respond to treatment, and further research is needed to improve its effectiveness and identify predictors of response.<br><br>
59
60   <b>Is CAR T cell therapy covered by insurance? </b><br>
```

```
51
52   CAR T cell therapy is a relatively new and expensive treatment, and coverage by insurance providers may vary. Some insurers may cover CAR T
53   cell therapy for certain eligible patients, while others may require prior authorization or may not cover it at all. Patients should consult
54   with their healthcare providers and insurance companies to understand their coverage options and potential out-of-pocket costs.<br><br>
55
56   <b>Are there any ongoing clinical trials for CAR T cell therapy? </b><br>
57
58   Yes, there are ongoing clinical trials exploring the use of CAR T cell therapy for various types of cancer, including both blood cancers and
59   solid tumors. These trials are aimed at evaluating the safety and effectiveness of CAR T cell therapy, as well as identifying ways to
60   improve its outcomes and reduce side effects. Patients may be eligible to participate in clinical trials based on their specific diagnosis
61   and medical history.<br><br>
62   </p>

23     <h3>Migraine: Understanding Symptoms, Triggers, and Treatment</h3>
24     <p>Dr. Saurabh Yatish Bansal | Mar 05, 2024<br><br>
25       <p>Migraine is a neurological condition characterized by recurrent headaches that can cause moderate to severe pain, often accompanied by other symptoms such as nausea, vomiting, and sensitivity to light and sound. It is a complex disorder with a wide range of triggers and manifestations, affecting millions of people worldwide. Understanding the symptoms, triggers, and treatment options for migraine is essential for managing this debilitating condition effectively.<br><br>
26
27
28
29   <b>Symptoms:</b><br><br>
30
31   The hallmark symptom of migraine is a severe headache that typically occurs on one side of the head and can last for hours to days. Migraine headaches are often pulsating or throbbing in nature and may be aggravated by physical activity. In addition to head pain, individuals with
```

```
30   migraine may experience:<br><br>
31
32   <b>Aura:</b><br>
33
34   Some migraine sufferers experience visual disturbances known as aura before or during the headache. Aura may include visual phenomena such as flashing lights, blind spots, or zigzag lines, as well as sensory disturbances such as tingling or numbness in the face or extremities.
35
36   <b>Nausea and Vomiting:</b> Many migraine attacks are accompanied by gastrointestinal symptoms, including nausea, vomiting, and stomach upset.
37
38   <b>Triggers:</b><br>
39
40   Migraine triggers vary widely among individuals and may include:<br>
41
42   Hormonal Changes: Fluctuations in estrogen levels, such as those that occur during menstruation, pregnancy, or menopause, can trigger migraines in some individuals.<br>
43
44   Certain Foods: Certain foods and beverages, such as aged cheeses, chocolate, caffeine, alcohol, and processed meats, may trigger migraines in susceptible individuals.<br>
45
46   Stress: Emotional stress, anxiety, and tension can precipitate migraine attacks or exacerbate existing symptoms.<br>
47
48   Sleep Disturbances: Changes in sleep patterns, including insufficient sleep or irregular sleep schedules, can trigger migraines in some people.<br>
49
50   Environmental Factors: Exposure to strong odors, bright lights, loud noises, or changes in weather or altitude may trigger migraines in susceptible individuals.<br>
51
52   Physical Factors: Intense physical exertion, such as strenuous exercise or sexual activity, can trigger migraines in some individuals.<br><br>
```

```
52      <b>Treatment:</b><br>
53
54      Treatment for migraine aims to relieve pain, reduce the frequency and severity of attacks, and improve quality of life. Treatment options
55      may include:<br><br>
56
57      <b>Medications: </b><br>
58
59      Over-the-counter pain relievers such as acetaminophen, ibuprofen, or aspirin may provide relief for mild to moderate migraine attacks. For
60      more severe or recurrent migraines, prescription medications such as triptans, ergotamines, or anti-nausea drugs may be prescribed.<br><br>
61
62      <b>Preventive Medications: </b><br>
63
64      For individuals with frequent or severe migraines, preventive medications may be prescribed to reduce the frequency and severity of attacks.
65      These medications include beta-blockers, antidepressants, anticonvulsants, and Botox injections.<br><br>
66
67      <b>Lifestyle Modifications: </b><br>
68
69      Lifestyle changes such as maintaining a regular sleep schedule, managing stress through relaxation techniques or therapy, staying hydrated,
70      and avoiding known triggers can help reduce the frequency and severity of migraines.<br><br>
71
72      <b>Alternative Therapies:</b><br>
73
74      Some individuals find relief from migraines through alternative therapies such as acupuncture, biofeedback, massage, or herbal supplements.
75      However, the effectiveness of these therapies varies, and more research is needed to establish their efficacy.<br><br>
76
77      In conclusion, migraine is a complex neurological condition characterized by recurrent headaches, often accompanied by other symptoms such
78      as nausea, vomiting, and sensitivity to light and sound. Understanding the symptoms, triggers, and treatment options for migraine is
```

```
74          essential for effectively managing this debilitating condition and improving quality of life for individuals affected by migraines. By
75          identifying triggers, implementing lifestyle modifications, and utilizing appropriate treatments, individuals with migraines can reduce the
76          frequency and severity of attacks and achieve better control over their symptoms.
77          </p>

23     <h3>LASIK Surgery: What to Expect and Who Is a Candidate</h3>
24     <p>Dr. Anita Sethi | Mar 05, 2024<br><br>
25
26       LASIK (Laser-Assisted In Situ Keratomileusis) surgery has revolutionized vision correction, offering millions of people around the world the opportunity to reduce or eliminate their dependence on glasses or contact lenses. Understanding what to expect from LASIK surgery and who is a suitable candidate for the procedure is essential for individuals considering this life-changing treatment.<br><br>
27
28     <b>What is LASIK Surgery?</b><br><br>
29
30       LASIK surgery is a type of refractive surgery that uses a laser to reshape the cornea, the transparent front part of the eye, to improve vision. By altering the curvature of the cornea, LASIK can correct common refractive errors such as myopia (nearsightedness), hyperopia
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47
48
```

```
(farsightedness), and astigmatism, allowing light rays to focus more precisely on the retina for clearer vision.<br><br>
<b>What to Expect During LASIK Surgery:</b><br><br>
<b>1. Pre-operative Evaluation:</b> Before undergoing LASIK surgery, you will undergo a comprehensive eye examination to assess your candidacy for the procedure. This evaluation will include measurements of your corneal thickness, refractive error, pupil size, and overall eye health.<br>
<b>2. Surgical Procedure:</b> On the day of surgery, numbing eye drops will be applied to ensure comfort throughout the procedure. A specialized instrument called a microkeratome or femtosecond laser is used to create a thin flap in the outer layer of the cornea. The flap is then gently lifted, and an excimer laser is used to reshape the underlying corneal tissue according to your unique prescription. The flap is repositioned, where it adheres naturally without the need for sutures.<br>
<b>3. Duration:</b> LASIK surgery is typically quick, with the actual laser treatment taking only a few seconds per eye. The entire procedure for both eyes usually takes around 15 minutes.<br>
<b>4. Recovery:</b> After LASIK surgery, you may experience temporary discomfort, dryness, or mild irritation in the eyes. Most patients notice an improvement in vision immediately after the procedure, with further enhancement over the following days.<br>
<b>5. Follow-up Care:</b> Your eye surgeon will schedule follow-up appointments to monitor your healing progress and ensure optimal visual outcomes. It is essential to attend all post-operative appointments and adhere to any instructions provided by your surgeon for the best results.<br><br>
<b>Who Is a Candidate for LASIK Surgery?</b><br><br>
While LASIK surgery can offer significant benefits for many individuals, not everyone is a suitable candidate for the procedure. Ideal candidates for LASIK surgery typically meet the following criteria:<br><br>
<b>1. Stable Refractive Error:</b> Candidates should have a stable refractive error, meaning their prescription has remained relatively unchanged
```

```
for at least one year.<br>
49
50 <b>2. Healthy Eyes:</b> Candidates should have overall healthy eyes, free from conditions such as glaucoma, cataracts, or severe dry eye syndrome.
<br>
51
52 <b>3. Adequate Corneal Thickness:</b> Sufficient corneal thickness is essential for the creation of a corneal flap during LASIK surgery. Candidates with thin or irregular corneas may not be suitable for LASIK but may be eligible for alternative procedures such as PRK (Photorefractive Keratectomy) or SMILE (Small Incision Lenticule Extraction).<br>
53
54 <b>4. Realistic Expectations:</b> Candidates should have realistic expectations about the outcomes of LASIK surgery. While the majority of patients achieve significant improvement in vision, perfection cannot be guaranteed, and some individuals may still require glasses or contact lenses for certain activities following LASIK.<br>
55
56 <b>5. Age:</b> While there is no strict age limit for LASIK surgery, candidates should be at least 18 years old, as refractive errors tend to stabilize by this age.<br><br>
57
58 <b>Conclusion:</b><br><br>
59
60 LASIK surgery offers a safe and effective solution for vision correction, providing many individuals with freedom from glasses or contact lenses. By understanding what to expect during LASIK surgery and who is a suitable candidate for the procedure, individuals can make informed decisions about their vision correction options. Consulting with an experienced eye surgeon is the first step in determining eligibility for LASIK surgery and achieving clearer vision and improved quality of life.<br>

23     <h3>Understanding Common Eye Conditions: Causes, Symptoms, and Treatment Options</h3>
24     <p> Dr. Anita Sethi | Mar 05, 2024 <br><br>
25
26       Our eyes are precious organs that allow us to see the world around us. However, they are susceptible to various conditions that can affect vision and overall eye health. Understanding common eye conditions, including their causes, symptoms, and available treatment options, is essential for maintaining optimal vision and seeking timely medical intervention when necessary.<br><br>
27
28       <b>1. Myopia (Nearsightedness)</b><br><br>
29
30       <b>Causes:</b> Myopia occurs when the eyeball is too long or the cornea is too curved, causing light rays to focus in front of the retina instead of directly on it. <b>Symptoms:</b> Difficulty seeing distant objects clearly, squinting, eye strain, headaches. <b>Treatment Options:</b> Eyeglasses, contact lenses, refractive surgery (e.g., LASIK, PRK) to reshape the cornea and correct vision.<br><br>
31
32       <b>2. Hyperopia (Farsightedness)</b><br><br>
33
34       <b>Causes:</b> Hyperopia occurs when the eyeball is too short or the cornea is too flat, causing light rays to focus behind the retina. <b>Symptoms:</b> Difficulty seeing close objects clearly, eye strain, headaches, blurred vision. <b>Treatment Options:</b> Eyeglasses, contact lenses, refractive surgery (e.g., LASIK, PRK) to reshape the cornea and improve near vision.<br><br>
35
36       <b>3. Astigmatism</b><br><br>
37
38       <b>Causes:</b> Astigmatism is caused by irregularities in the shape of the cornea or lens, resulting in distorted or blurred vision at all distances. <b>Symptoms:</b> Blurred or distorted vision, eyestrain, headaches, difficulty seeing at night. <b>Treatment Options:</b> Eyeglasses, contact lenses, refractive surgery (e.g., LASIK, PRK) to correct corneal irregularities and improve vision.<br><br>
39
40       <b>4. Presbyopia</b><br><br>
41
42       <b>Causes:</b> Presbyopia is a natural age-related condition that occurs when the lens of the eye loses flexibility, making it difficult to focus on close objects. <b>Symptoms:</b> Difficulty reading small print, holding reading materials at arm's length, eyestrain. <b>Treatment Options:</b> Reading glasses, progressive or bifocal lenses, monovision contact lenses, refractive surgery (e.g., LASIK, PRK) to correct near vision.<br><br>
43
44       <b>5. Cataracts</b><br><br>
45
46       <b>Causes:</b> Cataracts develop when the lens of the eye becomes cloudy, typically due to aging, UV exposure, certain medications, or underlying medical conditions. <b>Symptoms:</b> Blurred or cloudy vision, difficulty seeing at night, increased sensitivity to glare, colors appearing faded. <b>Treatment Options:</b> Cataract surgery to remove the cloudy lens and replace it with an artificial intraocular lens (IOL) to restore clear vision.<br><br>
47
```

```
48       <b>6. Glaucoma</b><br><br>
49
50       <b>Causes:</b> Glaucoma is a group of eye diseases characterized by damage to the optic nerve, often caused by elevated intraocular pressure (IOP). <b>Symptoms:</b> Initially asymptomatic (open-angle glaucoma), peripheral vision loss, tunnel vision, blurred vision, eye pain or redness (acute angle-closure glaucoma). <b>Treatment Options:</b> Medications (eye drops), laser therapy, microsurgery (trabeculectomy), minimally invasive glaucoma surgery (MIGS) to lower IOP and preserve vision.<br><br>
51
52       <b>Conclusion</b><br><br>
53
54       Understanding common eye conditions, their causes, symptoms, and treatment options is essential for maintaining healthy vision and seeking appropriate medical care when needed. Regular eye exams by an eye care professional are crucial for early detection, diagnosis, and management of eye conditions. By staying informed and proactive about eye health, individuals can protect their vision and enjoy a lifetime of clear sight.<br><br>
